Summary of Experience

I am a Project Software Engineer who has been working in software development for 10 years. I also had worked in projects from start to finish and I can contribute in one way or another in different software projects.

Here are a few different ways I can help:

As a Project Lead

- Lead a team of software developers programming applications for insurance industry clients.
- Ensured team members stayed on task.
- Assigned coding tasks to various team members.
- Regularly monitored work and cut problem members before issues became large.
- Responsible for quality of applications delivered for customer orders.
- Directed team meetings to check on progress and plan code direction.
- Attended development work prioritization meetings.

As a Consultant / Process analyst

- Study and collect data from business core
- Put my knowledge and experience at the service of the company
- Identify problems and Establish a resolution strategy
- Work with a global perspective and provide tools to find solutions

As a Developer

- Engineered modern applications with .NET or other frameworks.
- Built innovative microservices and Web Services base on Cloud.
- Efficiently deployed and integrated software engineered by team and updated integration/deployment scripts to improve continuous integration and deployment practices.
- Liaised with Product Managers to identify minimum viable product requirements and clearly defined feature sets into well-scoped user stories for individual team members.

As A Problem Solver

- Solve problems is one of the skills I'm most proud of, with no fear of learn anything new.
- Identify the cause of the issue and understand it fully in order to build strategies to prevent it.
- Identify the needs and wants of the customer,
- Assessing and evaluating the right method to come up with creative solutions,
- Choosing the best alternative among various options,
- Taking a balanced and unbiased decision,
- Using necessary tools or software to deliver quality
